

How do living things reproduce and why is this important in a life cycle?

Lesson 1	In this first lesson, you will recap your knowledge about the different life processes that help us classify living and nonliving things.	
Lesson 2	This week, you will learn in detail about the different life processes of reproduction in plants	 
Lesson 3	In this lesson, you will learn about the different stages of the life cycle in plants.	 
Lesson 4	In this week, you will learn about reproduction in animals and the life cycles of different types of animals: mammals, amphibians, insects and birds.	
Lesson 5	This week, using your knowledge from the previous lesson, you will compare the different life cycles of animals.	 
Lesson 6	In your penultimate lesson, you will classify and organise different creatures, giving reasons, by designing your very own zoo.
